

**6** combination of  
bullet and columns

Aggregates of columns  
and bullet rosettes.  
Identifiable individual  
columnar crystals in the  
aggregate.

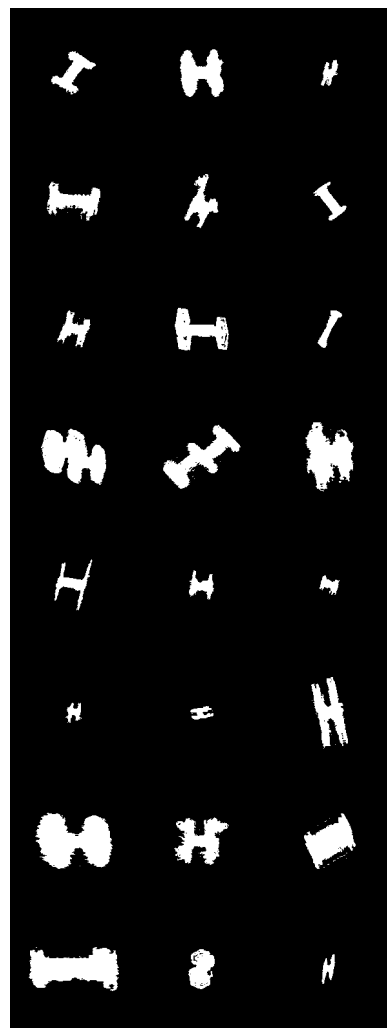

**7** complex  
assemblages

Sharp edges and  
transparency.  
aggregation of  
hexagonal plates / sector  
plates / stellar crystals.

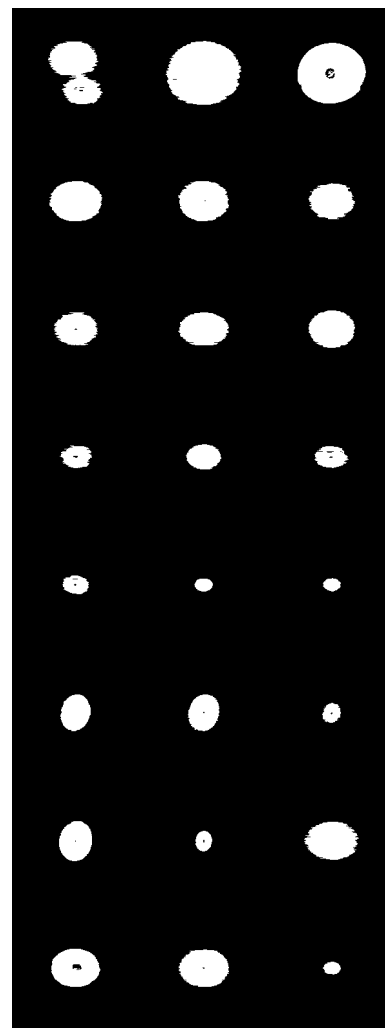

**8** capped  
columns

Appear 'H'-shaped  
depending on  
orientation.

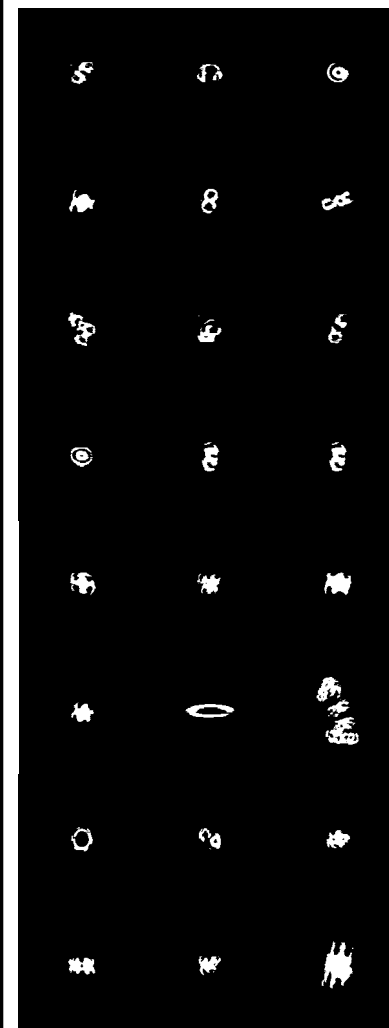

**9** water  
droplets

Very smooth, spherical  
particle. some have  
poisson spot

**0** diffracted

small, weird and  
unnatural looking. Major  
holes in the crystal.

**11** unknown
